WORK EXPERIENCE

Computer Draftsman

ABC Corporation - February 2015 - December 2015

Responsibilities:

- Responsible for structural detailing, as-builts alterations, pneumatic/hydraulic/fuel/gas piping, maintaining drafting standards, and meeting strict deadlines.
- Update project files (Master CNC, PDFs, AutoCAD, and Field data) and maintain communication with Project Engineers on any changes that arise.
- Collaborate with QA/QC personnel to ensure issued drawings are up-to-date, and revisions recorded and updated in project data books.
- Utilize drafting software Tekla Structural Detailing, Autodesk Inventor and AutoCAD 3D Mechanical to produce manufacturing and installation drawings.
- Elicited feedback from Construction Managers and Shop Foremen to improve manufacturing drawings, and improve overall communication between the Drafting, Engineering, and Construction divisions.
- Volunteered often, for field surveys, mappings, and inspections of rig components and systems, to compare to issued drawings and make the appropriate revisions as necessary.
- Checked and adjusted bill of materials to ensure drawings met material grade requirements as requested by Project Engineer through the use of building information modeling (BIM).

DRAFTSMAN
