PERSONAL STATEMENT

Senior Oracle Database Administrator plays a role in the analysis, design, implementation, and support of Oracle Server and NoSQL databases for our Digital Brand Services business unit. You will manage databases through multiple product lifecycle environments, from development to mission-critical production systems.

WORK EXPERIENCE

Senior Oracle Database Administrator/Consultant **Pittsburgh Paints And Glass (PPG) - April 2012 - 2020**

Responsibilities:

- Consults on the design of SQL queries and write SQL queries against tables
- Participates in performance tuning, table and schema design, and partitioning
- Identifies poorly performing SQL queries and PL/SQL code
- Independently analyzes, solves, and correct issues in real time, providing problem resolution end-to-end
- Refines and automates regular processes, track issues, and document changes; provide proactive and reactive data management support and training to users
- Shares domain and technical expertise, providing technical mentorship and cross-training to peers and team members
- Configures and maintains database servers and processes, including monitoring of system health and performance to ensure high levels of performance, availability, and security
