

# Robert Smith

## Associate Business Intelligence Architect

### PERSONAL STATEMENT

A driven leader with unparalleled collaboration and interpersonal skills and an ability to effectively communicate to all levels of an organization. 7+ years of leadership experience including building and managing teams of 5 - 20 individuals and forming/guiding agile teams using scrum.

### WORK EXPERIENCE

#### **Associate Business Intelligence Architect** **ABC Corporation - July 2007 - July 2010**

##### *Responsibilities:*

- Served as Scrum Master of Enterprise Data Warehouse / Business Intelligence team, helping the team transition to an agile development methodology.
- Served as Enterprise Data Architect on newly formed Enterprise Architecture team.
- Implemented Werner Architecture Process (based on The Open Group Architectural Framework - TOGAF) and tested process by creating baseline and target architecture plans for single sign on, including identity management components.
- Identified data quality was a gap preventing successful implementation of target data warehouse architecture.
- As a result, worked on bringing awareness to the cost of data quality problems and ultimately facilitated coordination between the data warehouse / business intelligence team, business subject matter experts and application teams to identify, prioritize and fix data quality issues at the source.
- Identified and implemented audit, balance and control procedures for the data warehouse to ensure that the critical data elements always match back to the source of record.
- Evaluated current data warehouse architecture related to data marts and determined the ETL tool and database for the target architecture.

#### **Business Intelligence Architect** **Delta Corporation - 2004 - 2007**

##### *Responsibilities:*

- Worked in collaboration with business and senior leadership teams to identify and establish information requirements, develop and implement .
- Monitored industry trends and identified emerging technologies that should be adopted, find and confirm corporate goals.
- Developed and Implemented new Business processes and Risk Management.
- Created Forecasting analysis tools.
- Created Pricing Tools.
- Responsible for customizing the ARRA data model, physical schemas to meeting Local Government data requirements using CA Data Modeler.
