### CORE COMPETENCIES

Architecture, Database Management, Computer, Hadoop, Teradata, Analytics.

### PROFESSIONAL EXPERIENCE

#### Data Warehouse Consultant III

ABC Corporation - July 2015 – November 2015

##### Key Deliverables:

- Migrated existing data from DB2 to Teradata 15.0. Analyze the existing stored procedure in DB2 and translate to Teradata Stored Procedures and BTEQ scripts.
- Analyzed the existing Informatica code and develop functional requirement to get data to the new Teradata environment.
- Communicated the report changes and work closed with the reporting team.
- Involved in data profiling and data modeling for the new requirements.
- Responsible for design, development and implementation of Customer and Billing System Data warehouse.
- Customized Complex ELT processes and resolved related issues.
- Improved ELT architecture and SQL scripts for improved performance.

#### Data Warehouse Consultant

Delta Corporation - 2011 – 2015

##### Key Deliverables:

- Enterprise Data Warehouse, Data Conversion Consolidate Group and Membership data is to enable one single repository in a common format for all groups and members from the various eligibility systems by combining the Facets, RAS and FEP with the RTMS data that will already be in the Common Record Format (CRF) layer of the EDW.
- Currently, Wellmark group and member data is fragmented across multiple eligibility systems in different formats.
- The only source that currently combines these sources is a legacy system where the new Facets data was forced into a legacy data structure and therefore not as complete.
- Other efforts to combine this data force manual efforts to combine the data as a first step to the analysis.
- This is Dummy Description data, Replace with job description relevant to your current role.
