## Objective

Software Engineer with many years of development, support, IT and hardware experience looking for a development position with a company that both encourages and nurtures creativity. Experience and work ethic will be an asset with any company and welcome the chance to face new technical challenges.

## Skills

Unix Administration, Middleware Engineer.

## Work Experience

### System Programmer

**ABC Corporation** - July 2007 - April 2011

- Developed, tested, documented and maintained a variety of programs and tools used to support departmental functions, faculty and staff needs.
- Created a make driven testing harness for verifying group program logic.
- Tested was sparse prior to deployment of the harness and automated testing was non-existent.
- Wrote, tested and documented a core set of reusable modules to handle common functions like file I/O, database interaction, templates and string manipulation.
- Improved and simplified maintenance by replacing inlined/copied logic with tested functions.
- Created a database module w/parser to abstract common functions needed when interacting with the department database.
- Handled transparently for command line, cron and web interaction.

### System Programmer

**Delta Corporation** - 2006 - 2007

- Programmed various types of integration system software Installed and set up audio-video, lighting, and security control systems Updated and managed .
- Freelance telecommuting employment for a Medicare Health Plan (HMO), based in Puerto Rico.
- Main tasks included data manipulation used for reporting and migration of data.
- Most projects include integration with multiple departments to arrive to a solution that maintains business rules.
- Software C#, VB.NET, ASP.NET, Sql Server, Access.
- Design, implement, maintain, administrate and oversee development for reconciling credit card transactions and e-commerce website using Perl, Java .
- Develop back end interfaces using PL/SQL stored packages, procedures, functions, Collections, Object Types, triggers, C, ProC, Perl, K-Shell scripts.
