

Objective

Over 7+ years of experience on performance testing of client-server, web services and web-based applications with exposure to diverse business domains that include healthcare, banking, insurance, telecom and government agency. Expert using Load Runner and Performance Center for performance engineering.

Skills

HP Load Runner, VSTS Performance Testing.

Work Experience

Performance Test Lead III

State Farm Bloomington Illinois - September 2015 – 2020

- Tested the modules Asset Lifecycle Management, Governance, Risk & Compliance and Financial Control & Reporting of Oracle Financial applications.
- Responsible for creating load test scripts using protocols such as Mobile (http/html), web(http/html), Click & Script, web services Responsible for Assigning load test generators, Configuring the runtime settings and scheduler aspect of LoadRunner Performance Center and LoadRunner Controller.
- Responsible for Creating the Load Test scenarios from scratch including assigning vusers for each script, Adding monitors for the system and Web Logic and IIS Application servers.
- Extensively used HP Performance center for execution of Load Tests for various Releases.
- Worked in both SCRUM and Waterfall Environments Used CA Wily Introscope for performance monitoring Responsible for updating of the Project Performance Test Strategy.
- Maintained Test Plan, Scenarios, and Test Cases in Quality Center.
- Assigned Test Cases to testing teams for functional, regression and load/performance testing.

Performance Test Lead

Delta Corporation - 2013 – 2015

- GetInsured is the nations easiest way to shop for health insurance.
- Since 2005, GetInsured has helped more than 2 million people find the health insurance policies that best fit their needs and their budget.
- Prepared Test Plan based on understanding the network design of System Architecture.
- Involved in writing and implementing the Test scripts using Load runner 8.0 Analyzing the process and updating the framework for Automation.
- Created Load test scenarios and data for execution Used SOASTA for Load testing and monitoring.
- Performed performance testing using Load runner scripts.
- Worked on JVM tuning with the tools like JRockit and New Relic.

Education

B. Tech In Information Technology - January 2001(Bharathidasan University - India)
