Enterprise Architecture, Data Modeling, Project Management, Administration.

Work Experience

Business Intelligence Architect

Freed Maxick CPA's Healthcare Practice - June 2015 - 2020

- Responsible for designing and implementing strategic BI framework, evolutionary plan and migration steps.
- Championed the efficacy of a disciplined approach to data management while concurrently demonstrating the value of data.
- Demonstrated in form and function significant ROI, while establishing that cost-of-entry is significantly less than expected assuming prudent decisions and a well-designed path forward.
- Taught the value of a holistic approach to data integration, highlighting such things as community health implications.
- Designed and built first multi-dimensional, multi-terabyte.
- Dramatically increased project profitability through automated sqls rather than manual manipulation on spreadsheets.
- Improved first generation accuracy and reliability exponentially, removing the element of human error and differing interpretations.

Business Intelligence Architect

Delta Corporation - 2010 - 2015

- Responsible for providing MDM, Data Warehousing strategies, and self-service.
- Provided capacity planning and staffing models to maximize agent utilization and minimize cost in times of rapid growth.
- Minimized cost related to critical processes such as foreclosure, bankruptcy, and on-boarding.
- Mitigated risk through real-time monitoring of critical legal requirements and steps related to foreclosure, bankruptcy, and Real Estate.
- Reduced cost and increased efficiencies through the automation of internal reports and metrics.
- Provided critical architecture design to incorporate operational, financial, demographic and perceptual data for the purpose of mining holistic and actionable insight.
- This is Dummy Description data, Replace with job description relevant to your current role.

Education

Bachelors of Science in Management - (St. John Fisher College - Rochester, NY)
