

Robert Smith

Senior Linux Administrator/Tehnician

PERSONAL STATEMENT

Natural born business leader with over 21 years of management, strategy, product development, delivery and operational experience in multiple industries. Over 15 years of IT related management/executive experience with an emphasis on building teams that can work harmoniously towards the desired goal in environments that are dynamic in nature.

WORK EXPERIENCE

Senior Linux Administrator/Tehnician

ABC Corporation - 2014 - 2015

Responsibilities:

- Configured LTO4 Tapes, NetBackup Policies, Backup Schedules and Full & Incremental Backups on Daily, Weekly and Monthly Basis
- Installed and Configured EMC Powerpath 5.0.2 and Emulex HBAs.
- Configured IBM Recommended Websphere Tunable Parameters on Solaris 10.
- Managed kernel tuning for applications and Oracle RAC databases on Red Hat servers.
- Performed operated system and blade firmware patching.
- Ensured data recovery by implementing system and application level backups.
- Performed various configurations that include networking and IPTables, resolving host names and SSH keyless login.
- Managed Disk File Systems, Server Performance, Users Creation and Granting file access Permissions and RAID configurations.

Senior Linux Administrator

Delta Corporation - 2011 - 2014

Responsibilities:

- Common activities included 24x7 on call support, Linux system upgrades, Disk space management, User management, System troubleshooting, and other administration task.
- Setup of Hadoop cluster for development and future production release where virtual servers are activated when needed and automatically registered via LDAP to an Active Directory server where they register themselves and receive their own IP address.
- Migration of a Tru64 Uni-Data database to Red Hat 6 server utilizing my scripting skills to make the process almost seamless.
- These Large High performance servers are used for DNA sequencing.
- Assist programmers and DBAs with the setup of Oracle, Oracle RAC, Web Sphere, Web Logic and Java including kernel tuning and multiple scripts for startup/shutdown and custom alerting.
- Built, maintained and monitor a PCI compliant environment for the company adhering to strict security policies.
- While monitoring I detected a slow scan threat that made it past the firewall and was able to close the hole promptly.
