## *Patent Examiner-Biomedical Engineering*

### PERSONAL STATEMENT

Seeking an employment opportunity that will allow demonstration of acquired skills from the experience in biomedical research, whilst encouraging the pursuit of higher education.

### WORK EXPERIENCE

#### ***Patent Examiner-Biomedical Engineering***

**United States Patent & Trademark Office - August 2007 - May 2019**

##### *Responsibilities:*

- Reviewed software patent applications to determine whether the claimed invention should be granted as a patent.
- Determined the scope of the invention claimed by the inventor.
- Searched scientific databases for relevant technologies to compare similar prior inventions with the invention claimed in the patent application.
- Examined patent applications substantively by examining whether the claimed invention meets the patentability requirements such as novelty, and sufficiency of disclosure.
- Communicated findings as to the patentability of an applicants invention via a written action to inventors, patent agents, and patent attorneys.
- Conducted interviews with inventors, patent agents, and patent attorneys to present findings, and/or to advance prosecution.
- Prepared examiners answers to appeal briefs to be sent to the board of patent appeals and interferences (BPAI).

#### ***Patent Examiner***

**ABC Corporation - 2005 - 2007**

##### *Responsibilities:*

- Examined cutting-edge technology in fields such as data warehouses, data marts, online analytical processing (OLAP), decision support systems, online transactional.
- Searched thousands of foreign patents and non-patent literature documents for relevant technologies to compare similar prior inventions with the invention claimed in the U.S. patent application.
- Reviewed hundreds of U.S. patent applications to determine whether the claimed invention should be granted a patent.
- Reported findings as to the patentability of an applicants invention via a written action to inventors and patent practitioners.
- Mentored Junior Examiners by reviewing their patentability reports and providing feedback.
- Communicated findings as to the patentability of an applicants invention via a written action to inventors, patent agents, and patent attorneys.
- Conducted interviews with inventors, patent agents, and patent attorneys to present findings, and/or to advance prosecution.
