### SUMMARY

Database Analyst with 9 years of experience providing strategic & creative data and marketing solutions using database knowledge and project management skills to achieve business goals within established deadlines.

### SKILLS

MS Office, Data Management Platform.

### WORK EXPERIENCE

#### Senior Database Analyst

ABC Corporation - 2012 - 2015

- Oversaw quality assurance of database marketing related projects for 3 properties.
- Monitored gaming system during promotions.
- Provided input on modifications to data warehouse to increase productivity and streamline job functions.
- Provided vendor management for secure transfer of data through FTP sites and ensured deadlines were met for direct mail projects.
- Provided decision makers with efficient tools to access data, create reports, and automate and streamline the process of creating and maintaining relational and multidimensional databases.
- Created ShowCase queries and SQL statements that integrated results directly into Excel spreadsheets for various departments to better report, audit, and retrieve patron segmentation.
- Created and managed analytical testing of focus groups that increased player worth and traffic through various offers; produced post analysis to review ROI.

#### Senior Database Analyst

Delta Corporation - 2007 - 2012

- Perform requirements analysis activities on National Vendor File project. Performed data analysis to identify significance and business usage of various elements in a vast database for the Social Security Administration Office of Disability Systems.
- Main drivers are the Electronic Disability Collect System and National Vendor File.
- Assist with data conversion process from silo legacy database files to nationwide repository.
- Additionally, document and publish meeting minutes when required.
- Utilize appropriate key tools, such as Rational RequisitePro, HP Quality Center, SharePoint, MS Office, and other Data Conversion and analysis tools to measure project progress against business-focused requirements.
- Utilize several programming and analysis tools and languages, such as DB2 database, COBOL, JES2, ChangeMan, VSAM, SCM, SRM, ENDEVOR, CICS, REXX, JCL, ORACLE, PL/SQL, COOLGEN, IBM ASSEMBLER, PL/1, Utilities, SQL Query tools, CMS Data Modeling tools, Java, XML, Oracle, MYSQL, COTS application, Data Mapping, MS Office, MS Word, MS Power Point, MS Visio, MS SQL, and other tools on the IBM mainframe, Servers and MS Windows.
- Key Accomplishments Accomplish requirements elicitation and documentation (Detailed Functional Requirements, User Need Analysis, Data Conversion Specifications, and Data Dictionary).
