PROFESSIONAL EXPERIENCE

Independent Software Consultant

ABC Corporation - March 2011 – October 2012

Key Deliverables:

- Participated in a Backup Portal web application project using Spring 3, MongoDB, JBoss, J2EE, HTML, JSP, CSS, jQuery.
- Implemented feature of Bing style pagination and Google-style suggestion (autocomplete), Email notification, XLS export, and other frontend features and backend business logic.
- Assigned by LTI, working as a consultant for General Electric Global Research on the Contract Analysis Tool web application, using J2EE, Spring, Hibernate, JPA, JUnit, WSDL, Eclipse, Oracle DB & MVC pattern.
- Created and implemented several web service clients from WSDL using the callback asynchronous invocation model, implemented thread pool for parallel invocation and handling response, integrated the client into another web application.
- Used sophisticated query to update table and data of database (Oracle) used by the application.
- Determined methods for the technical realization of given business logic requirements in collaboration with business analysts.
- Detect some important technical issues related to spring settings, architectural structure, and thread models in existing applications using reverse engineering into UML models.

Software Consultant

CA Technologies - 2007 – 2011

Key Deliverables:

- Became company certified in API Management (Layer 7) and CA Clarity PPM and exhibited the flexibility to provide support in both simultaneously.
- Oversaw and managed Access Management effectively for a variety of customers.
- Tasked with managing other resources after exhibiting my own reliability and commitment to my teams responsibilities.
