Work Experience

Lead Business Intelligence Architect

Change Healthcare - May 2013 – 2020

- Designed, developed and implemented an AWS Redshift cloud-based data warehouse.
- Standardized metric definitions for the engagement department.
- Implemented strategy holding over 50 discrete base metrics.
- Created a reporting analyst role and hired a top performer.
- Architected data structures and processed to provide consolidated cross-department data.
- Guided needs analysis for an external reporting portal and designed resulting solution.
- In AWS Redshift designed and developed both a star-schema database for point in time historical information and a flat table operational metric reporting database.

Business Intelligence Architect

Delta Corporation - 2011 – 2013

- Provided architectural review and guidance for business intelligence projects.
- Led committee that determined and documented standards for the business intelligence.
- Co-designed the Microsoft SQL Server processing environment.
- Involved in all aspects of the design including capacity planning, service distribution, security considerations and co-authored the migration plan.
- Led architect on the Enterprise Data Transformation data warehousing effort.
- Responsible for documentation and the conceptual design to support data.
- Responsible for reporting architecture including technology, methodology and standards for implementation and report delivery.

Education

Informix Software Education Services - (New Horizons Computer Learning Center - Irvine, CA)
