Objective

Twenty years of overall data warehousing, business intelligence and technology experience including over ten years as a data architect/analyst evaluating emerging information management technology used to analyze and support large volumes of structured and unstructured data. Gathered data requirements, documented data process flows, ensured data quality standards were met, created metadata repositories and data dictionaries and outlined data sourcing to target mapping and data remediation strategies.

Skills

Oracle SQL, Oracle Data Warehouse.

Work Experience

Oracle Consultant

ABC Corporation - October 2008 – October 2009

- Gathered the requirements from the business users and analyzing them to implement.
- Analyzed the business needs to make it better than what it is now.
- Created and implemented the various interface programs that act as integration tools between the different systems.
- Assisted in migration by creating reports needed which are not provided by standard reports that comes with the application.
- Allowed the client to create reports which were not possible using their current reporting tool.
- Dedicated IT resource for Pharmaceutical & Biotech Solutions, ESA APPRISE Oncology programs data management, root cause analysis and issue resolution.
- Wrote and executed backend DML for McKesson Call Center and customer management operations, FDA audit and annual assessment reporting, distributors.

Oracle Consultant

Delta Corporation - 2004 – 2008

- The project involved a very large software development based on Oracle and related tools for the use of banking and financial institutions.
- It had 23 modules like Saving, Checking, Loans, Securities, Foreign Exchanges, General Ledger etc.
- The focus of this project was on distributed computing and the database processing.
- Additionally, since the industry is so changing, the software had to be extremely flexible.
- It had a large number of stored procedures, functions and triggers.
- The major modules in the system are Deposit, Withdrawal (Partial, Full) Deposit closure (Premature, Mature), Tax deduction, Customer Statements; Query Module and Generation of Reports.
- Skills Used Oracle and ANSI SQL.
