## Objective

Accomplished IT Vice President with 6 plus years of experience leading complex projects, managing cross-functional resources, designing and executing information technology solutions for complex business problems involving large scale information management platforms.

## Skills

Information Technology, Data Management, ETL, Database Development, Data Warehousing, Project Management, Product Development, Customer Support

## Work Experience

### Vice President

**ABC Corporation** - January 2013 – Present

- Responsible leading the ETL center of excellence team with 15 plus professionals both onsite and offshore locations.
- Responsible for ETL administration/architecture, vendor relationship management, consulting services (ETL standards, common components, training), support services (l3 production support, maintenance activities, performance tuning, metrics &amp; monitoring) and user group sessions (lob liaison, cross lob enhancements, brown bags, train the trainer) across all the ETL platforms within the CCB ecosystem.
- Recruited, mentored and managed teams across different geographic locations.
- Established and managed test data management, data archiving and data federation service offerings within the firm that support different applications across multiple lobs.
- Built a self-service, metadata-driven multi-tier archive solution to actively archive the data based on retentions from various Oracle databases using Informatica ILM tool.
- Enhanced this framework to build a tactical archive solution to archive data from the ICDW Teradata database into HDFS.
- Assessed test data management needs across ICDW and Info1 that include a collection of data flow model diagrams, finding gaps/improvement areas with each business unit and presented a business case with the recommended approach along with implementation roadmap.

### Vice President - Temp

**ABC Corporation** - April 2007 – December 2007

- Established TDM framework utilizing Informatica TDM and built standard rules, policies, procedures and routines to support data subset and masking for various systems including Files, Oracle, and Teradata.
- Built toll gates to govern the pi classification based on enterprise PI/PII standards.
- Automated the build of TDM routines for ASCII files utilizing Informatica power center Mapplets and data masking transformation.
- Participated in architecture discussion to build a CCB big data ecosystem.
- Reported directly to the IT senior Vice President and Chief Information Officer, directed multi-million dollar systems analysis and development projects.

- Developed integrated management systems and processes for business effectiveness and compliance programs.
- This is Dummy Description data, Replace with job description relevant to your current role.
