Senior Test Lead III

Delta Corporation - 2002 – 2004

- Project Description 1.
- Web services Testing using SOAP-UI.
- Project Details As part of client mobile testing project the information related to an account (Investment/Fixed Loan/Variable Loan account) present in the ODS database should be displayed correctly on the Mobile app exactly the same as it currently appears on the OLS (Online Services) for different services such as Activity services, holding service, credit cards or loans.OLS is a desktop application.Webservices are used to make this happen to display the same information on Client Mobile.
- Scope of Testing Web services will hit the ODS data base using a request XML containing different filter parameters which are also applied on the OLS screen.

- The response generated from ODS database will then be validated against the information present on OLS screen using mapping documents as per the service.
- The same web service will be further used for pushing the details to another upstream system which will then display the details on Client mobile.
- Platforms Testing Objective of Platform testing basically deals with testing of the applications migrating from one platform to the other i.e.

Education

Master of Science in Computer Science - (McNeese State University - Lake Charles, LA)
