PERSONAL STATEMENT

Testing is looking for full-time Software Testing Lead ready to drive our software to release. The team lead will lead a group of 2-5 testers on a defined project from inception to release. This position is responsible for testing our software products, diagnosing issues, collaborating with others to find solutions, and documenting the results of tests. Strong leadership, communication, and analytical skills are required for the creation and execution of test plans. Software Testing Team Leads will work on a team of testers and work with product owners, managers, and developers to ensure high quality products.
